# CryptoCurrency Price Tracker

Vikram Guhilot
Harsha Ramayanam

Objective: The tracker will help the user get current crypto currency prices from the net, the app will allow the user search for various coins and like and save the coins they want to track into their cart, after tracking the coin and if the user decides to buy the coin they will have the ability to buy directly from as coin is already in the cart

The main purpose of this app is to understand how to use the React framework and how to build a responsive website using components
